

Energy & Utilities Consultant – Full Time and Intern

As an Energy & Utilities Consultant, you will focus mainly on assisting senior-level consultants in analyzing and developing large-scale utility operations and communications networks, costing alternative solutions, and developing strategic business solutions for our clients in the utilities industry. This role will allow you to develop new skill sets, while gaining knowledge of related business and technology solutions. At West Monroe Partners, we offer exciting career opportunities for people who seek challenges and want to manage the pace of their own career, while learning and being mentored by talented professionals and thought leaders in the Energy & Utilities industry. You will have an opportunity to interact and work with senior-level executives on challenging roles at an early stage in your career. Depending upon your interests, work may be in the areas of telecommunications, distribution engineering, transmission and substation engineering, distributed/renewable generation, information technology or enterprise asset management.

Your specific responsibilities may include

- Assessing and documenting current-state client business processes and procedures, identifying improvement opportunities in new business processes, capabilities, and supporting technologies for clients
- Analyzing various solutions utilizing different technologies and creating cost summaries for each scenario for the client
- Designing and engineering communication systems and creating cost summaries
- Building and maintaining large portions of the communications network and provide associated cost for the constructing and implementation effort
- Collaborating with West Monroe Partners' project teams and interfacing with all levels of client team members
- Learning and participating in the business development and sales process by assisting with project proposals, presentations, and new client activities
- Taking entrepreneurial ownership of the practice by contributing to the development of approaches, methodologies, and solutions for client engagements

We are seeking highly motivated individuals who meet the following criteria

- Efficiently manage multiple tasks and contribute in a fast-paced, team-oriented environment
- Problem-solver, with natural innovative and analytical skills
- Excellent leadership, communication (written and oral), interpersonal, and organizational skills
- Upbeat, friendly, motivated, and positive team builder

Qualifications

- Bachelor's degree in Electrical Engineering (or similar)
- Minimum major GPA of 3.00

Job Requirements

- Track record of outstanding academic performance in one of the following preferred majors:
 - Electrical Engineering
 - Environmental Engineering
 - Nuclear Engineering
- Experience with electric power generation systems, power grid operations, wireless communications and/or project management is desired

West Monroe Partners is an Equal Employment Opportunity Employer

We believe in treating each employee and applicant for employment fairly and with dignity. We base our employment decisions on merit, experience, and potential, without regard to race, color, national origin, sex, sexual orientation,

gender identity, marital status, age, religion, disability, veteran status, or any other characteristic prohibited by federal, state or local law.
